## A Different Kind of Lashes

### What Is The Difference Between Our Soft Magnetic Field And Others?

MLEN soft magnetic permanent eyelashes use segmented magnetic attraction technology. The magnetic force is precisely controlled by precision instruments to stabilize the fragile eyelashes most suitable for Asian women. Easy to wear without damaging eyelashes. No sense of weight.

The soft magnetic material is an imported polymer composite material, which is also our patented product (patent number ZL 2017 1 0005 832.6), which is 2 times lighter and thinner than industrial rubber magnets, and 3-4 times lighter and thinner than hard magnets. The specific magnetization method makes it difficult to demagnetize, and it can be worn and used repeatedly for 2-300 times without damaging the eyelashes.

The soft magnetic surface is specially treated, so it is not easy to fall off, and it will fit the eye shape more closely with the longer it is worn, and has a physical memory function.

The most important thing is that our soft magnetic is currently the world's thinnest, lightest, thinnest, but the best magnetic! Global patented products!

It is only 0.15mm thick, and a pair of magnetic stripe + eyelashes weighs only 0.028 grams! No glue is needed to reduce skin sensitivity, and will not be affected by the loss of your own eyelash metabolism, and there is no embarrassing shedding period; it is a substitute for traditional makeup eyelashes and a supplement for fashion eyelash extensions.

## MLEN Magnetic Eyelashes Reusable?

MLEN is the most advanced magnetic eyelash in the world. As long as it is opened and stored in the correct way, one set can be worn and used repeatedly, ranging from 2-300 times provided with good take care. It saves time and money and is more beautiful.

### Let's Be Real:

Applying fake lashes is no easy feat. Between the messy glue and the dexterity required to find the perfect placement, it can feel impossible to do it the right way. And that's not even to mention the annoyance of trying to peel off at the end of the night. In more ways than one, false eyelashes can often feel like a lot more trouble than they are worth.

### Enter Magnetic Lashes:

A way to wear falsies without literally any of annoyance usually associated with them. Instead of using lash glue - which, in addition to being wildly messy, can also cause allergies - these babies stick on your lashes with magnets. Think of it all of the glam with none of the goop.

## MLEN Lash Application & Tutorial

### How to Apply?

Learning how to use magnetic lashes is an interesting process. While it sounds easy peasy it will probably take quite a few tries to get your lashes to sit where they're supposed to.

Step 1:

Take out one eyelashes ad separate it into two pieces.

Step 2:

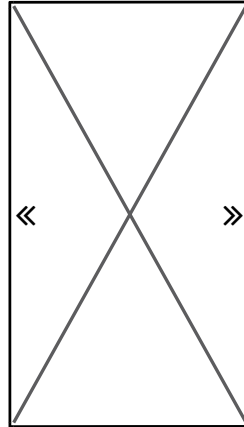

Align the soft magnet of the two eyelashes with the magnet of the auxiliary clip.

Step 3:

Fix the two eyelashes on the upper and lower sides of the auxiliary clip.

Step 4:

The arc position of the auxiliary clip should be aligned with the eyelash root, ad then it can be worn.

### How to Clean it?

Step 1:

Remove the eyelashes in the direction of the eyelashes.

Step 2:

Take a piece of paper towel that doesn't shed and open two eyelashes.

Step 3:

Use water or MLEN Eyelash Gel Cleaner on the clean cotton swab.

Step 4:

Brush the eyelash tip with a small cotton swab (clean).

Step 5:

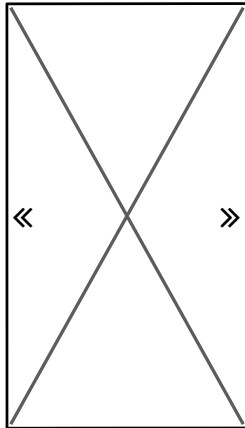

Finish cleaning, clean the surface again with a clean cotton swab, and put it in a dry environment for 5-10 minutes to achieve the drying effect.

Step 6:

When staring, put the magnetic stripe is downward and the eyelashes are upward. Use gravity to keep eyelashes curled.

Step 7:

Store in dry and clean environment prolong the service life of Milan soft magnetic.
